7 Steps to Apply for Your SMART Incentive

The Commonwealth’s new SMART Program offers exciting incentives for MA organizations. These incentives will step down over time, however, so you need to act fast! Here are 7 steps to help your organization get started.

1. Start planning your project with a trusted solar advisor
2. Negotiate and sign contract with a developer
3. Submit your interconnection application to utility
4. Solar vendor begins due diligence
5. Execute interconnection services agreement
6. Begin construction
7. Submit application for a SMART block

Unlike the SREC program, interconnection applications are due early in the process.

Start Planning Now to Make the Most of Your Solar Investment
