Superior performance, value and design

SunPower® patented carports are designed by a talented and experienced team of in-house architects and engineers working with your team to reduce energy costs, enhance the value of your real estate and strengthen your commitment to sustainability.

Adaptable solutions for any garage

SunPower’s garage top canopy installs efficiently on both new and existing parking garages, scaling to match your unique structure while maintaining the ideal southern exposure—regardless of garage orientation.

A track record of success

With more than 100 MW of carport installations nationwide, SunPower knows what it takes to meet milestones, keep your project on schedule and minimize any disruption to your organization.
