

POWERING A BRIGHTER TOMORROW™

Turning sunshine into energy is pretty cool, but do you know what's even better? Doing it all sustainably. Only SunPower offers solar panels that are as sustainable as the energy they produce.

Going solar is about more than saving money on electricity and producing clean energy. It's about powering a brighter future for generations to come.

BUILT SUSTAINABLY

From manufacturing to end-of-life, SunPower works to maximize the environmental benefit at each step of our product's lifecycle. A few of those practices include:

Developing **eco-friendly land management practices** for ground solar installations like re-vegetating an old junk yard and creating grazing lands.

Conserving and reducing water used in manufacturing by 30%.¹ When we use less, you use even less.

Going landfill-free at SunPower's Mexicali, Mexico, facility and **reducing waste across all facilities by reusing or recycling waste, or turning it into energy.**

Installing 4.7 gigawatts of solar globally, preventing 10 million metric tons of CO₂ from entering the air—the **equivalent of taking 2.1 million cars off the road.**

Ensuring that solar panels and the packaging they come in are also **reusable or recyclable.**²

LEADING THE WAY

When you choose SunPower, together we're at the forefront of changing the way our world is powered.

We are the world's **first and only solar company to be part of the Circular Economy 100**, joining other leaders and innovators in the movement to create a truly regenerative economy.

SunPower is the **first and only solar company to earn the prestigious Cradle to Cradle Certified™ Silver** designation for its panels manufactured in Mexico and France, comprising 75% of shipments globally.

Guardian Award for Sustainable Business Practices — Recognizing innovation in sustainable business practices.

Earned **solar's first and only landfill-free verification from NSF Sustainability** for our Mexicali, Mexico, Facility.

Patents for Humanity — **Recognizing the use of patented technology for social good.**

Recognized as one of **Green Builder's 2015 Eco-Leaders**, highlighting our commitment to responsible manufacturing, zero waste and Light on Land™ approach.

Top ratings on the **Silicon Valley Toxics Coalition's Annual Solar Scorecard** since 2012.

¹ 2014 usage compared to 2011 usage.

² Recycling facilities may not be located in your area.
