

Question: Can I buy less than one box of cells (1500 cells)? Can I buy less than one box of tabs (1200)?

Answer: SunPower can sell less than one box of cells but only if a partial box is available. SunPower cannot sell less than one box of tabs.

Question: I see SunPower cells for sale on the internet. Are these sales by SunPower also?

Answer: These are not SunPower sales sites. SunPower does not allow other companies to sell our cells. SunPower cannot guarantee the effectiveness or safety of those cells.

Question: Can I buy more cells than shown on the price list?

Answer: Yes, please provide a note on how many cells you are interested in and a sales person will get back to you.

Question: What is the difference between High and Medium Cosmetic Quality?

Answer: Cells with a high cosmetic quality have slight color variations on the front side. After laminating, the color of the solar cells has a dark appearance even with a black background. Cells with a moderate cosmetic quality have some color variations on the front side. After laminating, the color variations on the cells became less obvious but are often still visible when inspected from short distances.

Question: How can I attach the SunPower tabs to the cells?

Answer: There are a number of methods but often cell customers use a soldering iron.
